Profile

I spent nearly five years at Lebenshilfe Berlin supporting people with complex disabilities, their families and colleagues. In 2025 I worked on IT client projects at Hitachi Energy and Passion Group through Bakalorz IT Services, covering user support, device imaging, ServiceNow and hardware rollouts. I like finding what is actually wrong, explaining the next step plainly and following through. My Physics degree has a Computing major; I have since completed AI and computer vision training and Google's IT Support certificate.

Professional Experience

Educational Support Assistant (Pädagogische Assistenz), Lebenshilfe Berlin 09/2020 – 03/2025
Berlin

- Supported people with complex disabilities at a day support centre, adapting activities and communication to individual needs.
- Planned individual and group activities with an educational colleague and an occupational therapist.
- Collaborated with families, residential facilities, and colleagues; contributed to case discussions; and maintained accurate records.

Federal Voluntary Service (Bundesfreiwilligendienst), Lebenshilfe Berlin 09/2019 – 08/2020
Berlin
Supported daily activities alongside qualified staff before moving into the full-time assistant role.

Rollout Technician and Lead Technician, Bakalorz IT Services 01/08/2025 – 31/10/2025
Passion Group client project Essen / multiple sites

- Carried out hardware rollouts across sites and helped staff through system changes.
- Coordinated the technician team's work on site, sequencing tasks to meet the rollout schedule.
- Acted as the main technical contact during implementation and handover.

1st and 2nd Level IT Technician, Bakalorz IT Services 01/05/2025 – 27/07/2025
Hitachi Energy client project Brilon

- Prepared hardware and handled account-related steps for employee onboarding and offboarding, recording the work in ServiceNow.
- Created and distributed device images, securely wiped data with specialised tools and worked through incidents within the assigned service window.
- Diagnosed software and hardware faults directly with users and project leads.

Skills

User support

Windows devices, first and second level troubleshooting, onboarding and offboarding, imaging, hardware and software incidents, secure data wiping.

Operations

ServiceNow documentation, incident follow-up, device rollouts, team coordination, basic networking and backup procedures.

Development

Python, PyTorch, FastAPI, Docker and Git/GitHub through independent projects.

Earlier Experience

Administrative Assistant, *University of Ghana, College of Health Sciences*

2017 – 2018

Ghana National Service

Ghana

- Handled correspondence, records and routine requests in an academic healthcare setting.

Programs Coordinator, *Impact Health and Disability International (iHAND)*

12/2016

Paused for 2017–18 national service

Ghana

- Coordinated programme administration, community outreach, fundraising and activity reports.

Field Officer, *Agricultural and Rural Development Association (ARA)*

Ghana

Active before and after 2017–18 national service

- Worked on Weltwärts and medium-term service programmes in Greater Accra and Central regions, and on disability-related projects with iHAND. This role overlapped with iHAND.

Selected Project

Confidence-Aware Visual Inspection, *Independent*

github.com/isaacyanney/confidence-aware-visual-inspection

- Built and evaluated a six-class PyTorch prototype using procedurally generated textures; exposed predictions and an uncertain-result response through FastAPI, packaged it with Docker and added automated checks.

Education and Certificates

BSc Physics (major in Computing), *KNUST*

08/2013 – 07/2017

Second Class Honours

Ghana

Google IT Support Professional Certificate, *Google / Coursera*

04/09/2026

Certificate of Further Education, AI Engineering and Computer Vision,

19/08/2025 –
